KEEP OUT OF REACH OF CHILDREN

SAFETY PRECAUTIONS

Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may, and any eye contact will, cause irritation. Harmful to aquatic life with long lasting effects

PRECAUTIONS

USE WITH ADEQUATE VENTILATION. DO NOT EAT, DRINK OR SMOKE WHILE USING.

Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, at an ambient temperature and avoid freezing conditions. Avoid release to the environment.

FIRST AID

IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.

IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs get medical advice or attention.

IF IN EYES: Rinse cautiously with water for several minutes. If eye irritation persists get medical advice or attention.

IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. When seeking medical advice take this container with you.

Further information can be obtained from
AUST: POISONS INFORMATION CENTRE 131 126
or call Resene 1800 738 383.

NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766)
or call Resene 0800 737 363.

For use as a decorative/protective coating.

For full technical instructions see Data Sheet D30C.

SPILLS: Wear appropriate protective clothing. Absorb with sand or earth. Collect and seal in properly labelled drums. Do not allow to enter drains or to run off into waterways. Refer to local waste management authority.

CLEANING PAINT EQUIPMENT: Brush/roll out as much paint as possible onto newspaper before washing brushes and rollers. Dispose of wash-up water onto grassy/unsealed area or into inside sink/basin, NOT into outside stormwater drain where it may harm fish in local waterways.

Resene

Enamacryl CoolColour™ gloss waterborne enamel

exterior

**COOLCOLOUR
BK TONE**

Resene Enamacryl CoolColour™ is a gloss waterborne enamel that may be used in all areas traditionally reserved for solventborne enamels. Non-yellowing and fast drying with easy water clean up. Resene CoolColour technology uses sophisticated pigment technology to reflect more of the sun's energy than a standard colour, reducing heat build-up and stress on the coating and substrate. Resene CoolColours perform optimally on dark colours that are the most susceptible to heat build-up.

Preparation

- Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil (including mineral oil based wood finishes or similar) and salt.
- Remove accumulated windblown salt by washing with Resene Paint Prep and Housewash (see Data Sheet D812).
- If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80). Efflorescence on masonry **must be treated** (see Data Sheet D83).
- Corrosion on metals should be removed.
- Fill cracks and holes with an appropriate filler after priming.
- **All sanding dusts may be harmful and appropriate protection must be worn. In particular dusts from old lead or chromate based paints or old building materials containing asbestos may be injurious to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.**

For new work ensure the surface is sanded to a smooth finish and dusted off. Round all sharp edges. Ensure the surface is dry before painting.

- Ensure cementitious surfaces are fully cured, or treated with Resene Limelock (see Data Sheet D809), before coating. Undercured cementitious surfaces can significantly affect the performance and colourfastness of applied paint.
- For repaints thoroughly sand and wash to remove all signs of surface contamination. Ensure the surface is dry before painting. Spot prime bare areas.
- This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or reseller for advice.

For optimum heat reflection, use Resene Enamacryl CoolColour with a primer coat of Resene Quick Dry (see Data Sheet D45), Resene Galvo-Prime (see Data Sheet D402) or Resene Concrete Primer (see Data Sheet D405) immediately below the Resene CoolColour topcoat. Primer selection will depend upon substrate.

Resene CoolColours perform optimally on dark colours that are the most susceptible to heat build-up.

- Resene TimberLock (see Data Sheet D48) is recommended on Cedar and timber joinery before priming. Prime other timbers with Resene Quick Dry.
- Resene Quick Dry must be used as the first coat on Matai, Spotted Gum, Totara, fibre and particle board.
- Prime smooth/glossy cementitious surfaces with Resene Concrete Primer to assist with topcoat adhesion. Spot prime any nailheads with Resene Galvo-Prime.
- Repainting – spot prime with the appropriate primer and undercoat with Resene Quick Dry.
- Consult your Resene ColorShop or reseller for metal primers and if corrosion is present.

Topcoat

- Apply two coats in the required colour allowing at least two hours between coats.
- Maintain good ventilation throughout the drying and post application curing period to ensure the paint is properly cured. This may require use of an extraction system when painting in marginal painting conditions. Do not use gas or diesel burners to heat coated area as these produce water that will inhibit drying and curing. Poor ventilation may affect appearance and performance.

Maintenance (after a minimum of four weeks' drying)

See the Resene Caring for your paint finish brochure or the Resene website for full cleaning instructions.

Be PaintWise

For tips on responsible disposal of paint, cleaning equipment and minimising the impact of your decorating on the environment see the Resene website. Do not discharge any paint into the environment. Resene PaintWise (NZ) or paintback.com.au (Australia) accepts residual unwanted paint and packaging. Or contact your Local Authority for disposal information.

Manufactured under a quality system certified as complying with ISO9001 by Telarc SAJ, an accredited certification body. Printed on environmentally responsible paper which complies with the requirements of environmental management systems EMAS and ISO14001, using vegetable-based inks.

Quick check

Use on: Most surfaces where a durable gloss finish is required.

Gloss level: Gloss.

Coverage: 12 square metres per litre per coat.

The spreading rate recommended for this product will achieve hiding in two coats for most colours. Increased spreading rates can be used but additional coats may be needed to achieve required film build and hiding. See the Resene website for more information.

Dry time (minimum): Touch dry 45 minutes. Do not apply at temperatures below 5°C or when temperatures are liable to drop below this during drying period. Drying is slowed by low temperatures and high humidity. Do not apply under damp conditions.

Recoat time (minimum): 2 hours.

Serviceable after: While the coating is serviceable after 48 hours depending on film thickness, tinter level and drying conditions, it will still be in the curing stage so care needs to be taken with contact and wiping.

Primer required: Yes.

Usual number of coats: Two. Bright colours may require an additional coat.

Application method: Brush, speed brush, roller or spray.

Thinning: In hot conditions may be thinned with up to 5% Resene Hot Weather Additive to slow drying. For a smoother finish when applying by brush to trim and joinery, use Resene Brushing Additive. DO NOT use Resene Hot Weather Additive and Resene Brushing Additive together.

Clean up: Water.

Colour range: Resene Total Colour System including BS5252, Multi-finish, Whites & Neutrals and The Range.

Application of a Resene CoolColour will reflect more heat than the same colour made using non-cool pigmentation and reduce heat related stress on the substrate; it will not make the painted surface cool to touch. Check with Resene staff whether a Resene CoolColour is right for your project.

Before use: Stir well with a wide flat stirrer.

Enjoy the Resene Promise of quality on premium paints. See your Resene ColorShop or the Resene website for a copy.

In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

Please ensure that use of this product is compatible with the substrate and surface preparation method and that the colour in this container is the same as selected. When using multiple packs of this product on the same project please mix them together before use. Resene does not accept any responsibility for the application of incorrect product to substrate or the application of incorrect colours. Resene products are designed to be used as a system for optimal results. Substitution may cause substandard results or system failure. For further painting advice and information, call 1800 738 383 (AUST), 0800 737 363 (NZ) or visit the Resene website.
